

4 Courses

Web Application
Technologies and Django

Building Web Applications in
Django

Django Features and
Libraries

Using JavaScript, JQuery,
and JSON in Django

Mar 26, 2022

Marco Antonio Parra Fernández

has successfully completed the online, non-credit Specialization

Django for Everybody

This specialization introduced Python programmers to building web sites using the Django library. Across the four courses, students learned HTML, CSS, SQL, Django, JavaScript, jQuery and JSON web services. Students built online web sites using Django that were graded throughout the four courses.. This series provides excellent preparation for learning other ways to build web applications using technologies like PHP, Flask or Ruby on Rails.

Charles R. Severance,
Clinical Professor of
Information, School of
Information

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
